

Croatia Floorball

The Croatian Floorball federation has been registered in the country of Croatia.

The president of that federation is Mr Tomislav Djakovic.

There is a group of Croatian players living in Sweden who are committed to bring the federation forward. Our main focus is to reorganize and strengthen that federation so that we build the sport of Floorball in Croatia. Mr. Danijel Komsic would engage the role as coordinator of the national side as well as a communication channel to our colleagues in Croatia. Mr Nikola Marincic would serve as the contact person towards the IFF and Tomislav Marincic as an advisor/developer.

By getting more staff into the federation we believe that we can get the ball rolling more effective. The national team is to some extent organized, and we need to focus our attention on presenting the sport to schools and organize clubs in Croatia. One of the most primary goals will be to find more people who live in Croatia who can get leading roles to bring the sport to life.

Concerning rules and regulations we will reach out for help from other countries and learn from how they did initially. Since many of us are educated in the Swedish style we have that experience to bring to the table but we need to take it step by step considering the lack of equipment currently in the country.

A basis for the support will definitely be contacting schools and offer them to try the sport. In a larger scale we would like to build clubs and start season games between teams, geographically located close to each other so that it becomes practical.

Regarding the upcoming member application we will investigate the current status of Floorball in Croatia and to what extent it is being played at the moment. A copy of the registration at the Croatian authorities to follow as well.
