

The IOC will during the autumn of 2007 make the similar evaluation of the International Sport Federations which are members of ARISF and the non-recognised who are applying for recognition of the IOC, like in 2003. The timetable for achieving the 50 member federations is by November 2007, which is in 15 months from now.

The strategy for IFF to achieve the target of the required 50 member federations is a three phased process, where we must focus on the following issues; that we have active and qualitative members, the new members are starting up their activities according to our quality definitions and that we have the resources and materials to support these new federations.

Strategy:

- A) To approach the present IFF Associations, which have been more or less active lately (Brazil, New Zealand, Ukraine), if there are anything IFF can do to support them. To continue building on the IFF Floorball Development Programme Seminar in order to approach all the IFF members before the end of 2007.
- B) Approach all the present contacts we have collected on the Target list by firstly letter and then personal contacts, in order to build a plan for the path to formation of an Association. This by using all our contacts in the present member associations. The idea is to build a support package for these new associations consisting of the IFF Start-up kit, a How to get started kit (coaching, needed organisation and a referee instructions) and how to organise a tournament and a series.
- C) Actively look for new Floorball related contacts, in order to find new potential members, but also keep up the education of the present ones.

The main idea is not to give money to any aspirant, but to support, based on achievement when there are some results.

The target list has been built based on the knowledge we have of the present floorball activities in these countries:
